

#### **TITLE OF THE INVENTION**

**[0001]** Multimedia Gift Card.

#### **CROSS-REFERENCE TO RELATED APPLICATIONS**

**[0002]** Not Applicable.

#### **STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OF DEVELOPMENT**

**[0003]** Not Applicable.

#### **REFERENCE TO A "SEQUENCE LISTING," A TABLE, OR A COMPUTER PROGRAM LISTING APPENDIX SUBMITTED ON A COMPACT DISC.**

**[0004]** Not Applicable.

#### **BACKGROUND OF INVENTION**

##### **(1) FIELD OF INVENTION**

**[0005]** The field of art for which the Multimedia Gift Card pertains to is gift card, multimedia/music compact disc, gift certificates and promotional material.

##### **(2) DESCRIPTION OF PRIOR ART**

**[0006]** Music recorded on all types of medium has been sold and given as gifts for many years.

**[0007]** Seasonal and non-seasonal gift cards have also been a primary means to express sentiment and celebrate a multitude of events.

**[0008]** Corporations and businesses have often given small gifts to employees, sales staff and customers which include pens, cups, glasses, bumper stickers, hats, and shirts, usually displaying the company colors, logos, and information. All of these items, when given, are perceived as gifts to the receiver, however; also have immense promotional value for the provider.

**[0009]** Retailers often provide gift certificates for purchase that are usually in the form of a plastic credit card. These gift certificates are usually not packaged to be given as a gift. Most gift cards hang from a piece of cardboard on a display rack previously sold with a single piece of cardboard which sometimes could be folded into a simple card. Retailers relied on displaying individual gift certificates from a single piece of cardboard, paper or plastic. The purchaser in most cases would have to purchase an additional card to send or give the certificate, coupon or prepaid phone card as a gift.

**[0010]** The advent and mass production of the personal computer, reduction in system cost, and increased popularity and accessibility to the internet, has enabled most consumers to own or have access to a computer. The exponential growth and availability of digital quality audio, video and graphics accompanied by the many compression formats and increased storage capacity of digital medium has provided a unique and diverse avenue for promotion by corporations, business, brokers, retailers, and universities.

#### **BRIEF SUMMARY OF THE INVENTION**

**[0011]** The multimedia gift card consists of three major components. A customized gift card, a disc, or other form of digital medium will be used, but is not limited to, hold digital quality music and graphics, and a gift certificate or a prepaid phone card.

**[0012]** The gift card is uniquely designed and customized to represent the corporation, business, brokerage firms, retailers or universities for which the gift card is made. The multimedia disc is included as a gift that displays a label which supports or matches the cards overall theme or design. The multimedia disc contains, but is not limited to, professionally recorded digital music, computer generated multimedia presentations, video presentations, company information and printable coupons. Die-cuts are made in the card to receive the multimedia disc, prepaid phone card or gift certificate.

**[0013]** The multimedia gift card is designed for corporations to present a personalized gift to employees, sales personnel and business associates. This invention combines conventional

marketing technology, computer generated graphics and digital audio and video to create a total gift package.

**[0014]** The multimedia gift card provides retailers a creative, unique and personal packaging for their gift certificates, prepaid phone cards and products. The outstanding digital music, which is included as a special gift, will provide many years of listening enjoyment while the disc label information provides a lasting reminder of the multimedia discs origin. This invention will create a memorable tie to the provider that will ultimately create a favorable and lasting emotional bond with the receiver. This invention combines marketing, promotion, and entertainment to create an invaluable promotional tool as well as a vehicle to distribute products and information.

#### **BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWINGS**

**[0015]** The drawings include bi-fold, tri-fold and multi-fold Multimedia Gift Cards of various shapes, sizes, folds and design characteristics. Some cards exhibits die-cuts to receive a Multimedia Disc and gift certificate.

**[0016]** FIGURE 1: Displays an example of a Top Folding Bi-Fold card design that is open with a Multimedia Disc.

**[0017]** FIGURE 1a: Displays an example of a Top Folding Bi-Fold card design that is closed.

**[0018]** FIGURE 2: Displays an example of a Side Folding Bi-Fold card that is open with a Multimedia Disc.

**[0019]** FIGURE 2a: Displays an example of a Side Folding Bi-Fold card that is closed with a Multimedia Disc.

**[0020]** FIGURE 3: Displays an example of a a Tri-Fold card design that is open with a Multimedia Disc.

**[0021]** FIGURE 3a: Displays an example of a Tri-Fold card design that is closed with a Multimedia Disc.

**[0022]** FIGURE 4: Displays an example of a Top Folding Bi-Fold card design that is open showing the die-cuts that receives a Multimedia Disc and a gift certificate.

**[0023]** FIGURE 5: Displays an example of a Side Folding Bi-Fold card design that is open showing the die-cuts that receives a Multimedia Disc and a gift certificate.

**[0024]** FIGURE 6: Displays an example of a Tri-Fold card design showing the die-cuts that receives a Multimedia Disc and a gift certificate.

**[0025]** FIGURE 7: Displays an example of a Multi-Fold card design showing the die-cuts that receives a Multimedia Disc and a gift certificate.

**[0026]** FIGURE 8: Displays an example of a Top Folding Bi-Fold card design showing the die-cuts that can receive a Multimedia Disc and gift certificate. The gift certificate is concealed when the gift card is closed. The gift certificate can be placed in either position, at the bottom or top of the card, depending on the overall card design.

**[0027]** FIGURE 8a: Displays an example of a Top Folding Bi-Fold card design that is open with a Multimedia Disc and Gift Certificate placed inside. The gift certificate is concealed when the gift card is closed. The gift certificate can be placed in either position, at the bottom or top of the card, depending of the overall card design.

**[0028]** FIGURE 8b: Displays an example of a Top Folding Bi-Fold card design that is closed.

**[0029]** FIGURE 9: Displays an example of a Top Folding Bi-Fold card design that is open with a Multimedia Disc and a gift certificate. The gift certificate is positioned to allow easy access to the magnetic strip or Bar Code that is placed on the back of the gift card. This will allow easy access for retail sale.

**[0030]** FIGURE 9a: Displays an example of a Top Folding Bi-Fold card design that is closed. The gift certificate is positioned to allow easy access to the magnetic strip or bar code that is placed on the back of the gift card. This will allow easy access for retail sale.

**[0031]** FIGURE 10: Displays an example of a Side Folding Bi-Fold card design that is open with a Multimedia Disc and a Gift Certificate. The gift certificate is concealed when the gift card is closed.

**[0032]** FIGURE 10a: Displays an example of a Side Folding Bi-Fold card design that is closed. The gift certificate is concealed when the gift card is closed.

**[0033]** FIGURE 11: Displays an example of a Side Folding Bi-Fold card design that is open with a Multimedia Disc and a gift certificate. The gift certificate is positioned to allow easy access to the magnetic strip or bar code that is placed on the back of the gift card.

**[0034]** FIGURE 11a: Displays an example of a Side Folding Bi-Fold card design that is closed. The gift certificate is positioned to allow easy access to the magnetic strip or bar code that is placed on the back of the gift card. This will allow easy access for retail sale.

**[0035]** FIGURE 12: Displays an example of a Tri-Fold card design that is open with a Multimedia Disc and a gift certificate. The gift certificate is positioned to allow easy access to the magnetic strip or bar code that is placed on the back of the gift card.

**[0036]** FIGURE 12a: Displays an example of a Tri-Fold card design that is closed with a Multimedia Disc and a gift certificate. The gift certificate is positioned to allow easy access to the magnetic strip or bar code that is placed on the back of the gift card. This will allow easy access for retail sale.

**[0037]** FIGURE 13: Displays an example of a Tri-Fold card design that is open with a Multimedia Disc and a gift certificate. The gift certificate is concealed when the gift card is closed.

[0038] FIGURE 13a: Displays an example of a Tri-Fold card design that is closed with a Multimedia Disc and a gift certificate. The gift certificate is concealed when the gift card is closed.

[0039] FIGURE 14: Displays an example of a Multi-Fold card design that is open with a Multimedia Disc and a gift certificate.

#### DETAILED DESCRIPTION OF THE INVENTION

[0041] For the purpose of describing this invention, the definition of **provider** will include, but not be limited to individual businesses, corporations, retail establishments, brokerage firms, universities, professionals and sales personnel that utilizes the Multimedia Gift Card for its intended use.

[0042] For the purpose of describing this invention, the definition of **receiver** is the person who receives the end product for personal use.

[0043] For the purpose of this invention, the definition of a **Multimedia Disc** will include, but not be limited to, any medium that can store digital data to include Compact Discs, Mini Compact Discs and DVD's.

[0044] The card exterior displays the artwork. The physical characteristics are individually designed to best support the overall card design and represent the provider. A bi-fold, tri-fold or multi-fold card of various shapes and sizes are used. Computer generated graphics are printed on heavy weight paper to medium weight cardboard. Every card is folded, die-cut and glued to receive, but not be limited to a multimedia disc, gift certificate, coupon or phone card. The gift certificate/coupon is placed in the card for easy accessibility and scanning by the retailer. The

multimedia disc is placed in the card so that the label is in view. Both types of cards are available with an envelope that can be sent via mail or any other standard method of shipping.

**[0045]** The card displays professionally created artwork, logos, seasonal, special occasion and festive graphics that best portray the provider's intent for the overall multimedia card design. The artwork will vary for each application and can have a multitude of colors, designs and themes. All sides of the card can be used depending on the providers overall card and multimedia disc design.

**[0046]** The Multimedia Disc can include, but is not limited to:  
Seasonal and non-seasonal professionally recorded digital music, (to include, all varieties, types, and styles), multimedia presentations, video, product information, store locations, databases, printable coupons, catalogues, personal and corporate history information, web site links, university information and curriculums.

**[0047]** The multimedia disc label will be designed to match the artwork of the card and will include, but not be limited to, song titles, artist names, logos, and provider information. The personalized label will continually remind the receiver of the multimedia disc's origin, which will ultimately create a lasting tie to the provider.
